CONTENTS OF VOLUME 11

Volume 11 No. 1 January 1996

Editorial v

STEPHEN T. ASMA / Darwin's Causal Pluralism 1–20

RICHMOND CAMPBELL / Can Biology Make Ethics Objective? 21–31

BRUCE H. WEBER and DAVID J. DEPEW / Natural Selection and Self-Organization 33–65

MARCEL WEBER / Evolutionary Plasticity in Prokaryotes: A Panglossian View 67–88

DAVE WENDLER / Innateness as an Explanatory Concept 89–116

Reviews:

STEPHEN DOWNES / Science As It Is 117–120

FREDERICK GRINNELL / Publishing Science Responsibly 121–125

GREGORY M. MIKKELSON / A Review: The Large, the Small, the Real and the Natural 127–132

Booknotes 133–139

Volume 11 No. 2 April 1996

TOM SETTLE / Six Things Popper Would Like Biologists Not to Ignore: In Memoriam, Karl Raimund Popper, 1902–1994 141–159

DAVID N. STAMOS / Popper, Falsifiability, and Evolutionary Biology 161–191

KIM STERELNY / Explanatory Pluralism in Evolutionary Biology 193–214

JEAN GAYON / The Individuality of the Species: A Darwinian Theory? – from Buffon to Ghiselin, and Back to Darwin 215–244

Discussion:

BRUCE N. WALLER / Moral Commitment without Objectivity or Illusion: Comments on Ruse and Woolcock 245–254

LEIGH M. VAN VALEN / On Interdisciplinary and Such 255–257

Reviews:

MICHAEL BRADIE / Taking Popper Seriously 259–270

PATRICIA A. WILLIAMS / Sociobiology and Philosophy of Science 271–281

Booknotes 283–288

Volume 11 No. 3 July 1996

NICHOLAS AGAR / Teleology and Genes 289–300

WAYNE CHRISTENSEN / A Complex Systems Theory of Teleology 301–320

BOB BERMOND and JAAP VAN HEERDEN / The Müller-Lyer Illusion Explained and Its Theoretical Importance Reconsidered 321–338

MICHAEL R. DIETRICH / Monte Carlo Experiments and the Defense of Diffusion Models in Molecular Population Genetics 339–356

WILLIAM HARMS / Cultural Evolution and the Variable Phenotype 357–375

KIM STERELNY, KELLY C. SMITH and MICHAEL DICKISON / The Extended Replicator 377–403

BRADLEY E. WILSON / Changing Conceptions of Species 405–420

Review

KAREN WENDLING / Is Science Unique? 421–438

Booknotes 439–443

Volume 11 No. 4 October 1996

SPECIAL ISSUE ON BIOLOGY & RELIGION

Guest Editor: Michael Ruse

JOHN C. GREENE and MICHAEL RUSE / On the Nature of the Evolutionary Process: The Correspondence Between Theodosius Dobzhansky and John C. Greene 445–491

PAUL A. NELSON / The Role of Theology in Current Evolutionary Reasoning 493–517

GRAHAM OPPY / Hume and the Argument for Biological Design 519–534

* * *

Discussions

PHILLIP E. JOHNSON / Is Genetic Information Irreducible? 535–538

RICHARD DAWKINS / Reply to Phillip Johnson 539–540

GEORGE C. WILLIAMS / Reply to Johnson 541

* * *

ROBERT T. PENNOCK / Naturalism, Evidence and Creationism: The Case of Phillip Johnson 543–559

PHILLIP E. JOHNSON / Response to Pennock 561–563

ROBERT T. PENNOCK / Reply: Johnson's Reason in the Balance 565–568

* * *

Booknotes 569–575
